

Used Gas Fired Baker Crucible Furnace, model B-80

Serial No. 319

This #80 crucible size of furnace is able to melt a variety of metals (Aluminum, Brass, Copper, Gold, Silver). Its compact size makes it very suitable for either home and/or small industrial applications.

- 275 lbs. holding capacity of brass with #80 crucible, or other non-ferrous metals (or 90 lbs. of aluminum)
- Furnace includes a used crucible
- Thermally efficient ceramic fiber insulation
- Burner includes flame supervision
- No temperature controller, but one is available as an option
- Drain door at furnace floor level
- Natural gas or propane fuel
- 115 Volts, 6.6 Amps, 1 phase power required
- This furnace will be tested and fully operable before shipment

Price **\$6,400** without automatic temperature control

Or **\$7,300** including a new valve actuator, used temperature controller and new thermocouple
(Price of this furnace new is \$20,500 plus \$250 crating cost)

Subject to sale without notice
