Email:

1. What is the thermal process you wish to accomplish?
2. What material do you wish to process?
3. What is the chemical composition?
4. What are the desired changes in the material being processed?
5. Do you prefer continuous or batch processing?
6. What is your desired production capacity?
7. How many days per week and hours per day will the equipment be used?
8. What is the starting moisture content?

Thermal Processing Systems Questionnaire

9. What is the maximum process temperature?
10. What is the process preheating time?
11. What is the process main heating time?
12. What is the process cooling time?
13. What is the required process atmosphere?
14. Describe any critical process issues.
15. Describe any corrosive or exothermic issues related to your process.
16. Do you prefer gas or electric heating? What are your utility specifications?
17. Do you prefer PC/PLC or discrete controls?
18. Are you interested in automating your process?

Thermal Processing Systems Questionnaire

19. What functions are you most interested in automating?

20. Do you need budgetary information or a firm proposal?

21. What is the anticipated schedule for your project?

22. Remarks:
